PROFILE:

Motivated and passionate IT undergraduate and aspiring Web Developer with a strong interest in designing and developing modern, responsive, and user-friendly web applications. Possess a growing foundation in HTML, CSS, JavaScript, databases, and programming, with a strong passion for learning new technologies and solving real-world problems. A creative, adaptable, and detail-oriented individual who enjoys turning ideas into practical digital solutions and is eager to grow as a professional software and web developer.

PROJECTS:

FLEXWEAR FASHION STORE

FlexWear is a modern online fashion shopping platform designed to provide customers with a smooth and convenient way to discover and purchase clothing and fashion products online. The platform includes product browsing, categories, search, filtering, product details, shopping cart, checkout, and order management features. Its main focus is to deliver a clean, stylish, responsive, and user-friendly shopping experience across desktop and mobile devices.

ALMA'S KITCHEN WEBSITE

ALMA'S KITCHEN is an e-commerce website designed for selling a wide range of kitchen appliances, home appliances, cookware, glass items, fans, chairs, and kitchen tools online. Customers can browse products, search and filter items, view product details, add products to the cart, and place orders using Cash on Delivery or Bank Transfer. The system also includes an Admin Panel where administrators can manage products, categories, customers, orders, payments, and other website operations. The main goal of ALMA'S KITCHEN is to provide a simple, user-friendly, and efficient online shopping platform for customers while making store management easier for administrators.
